# 「關懷獨居老人服務計劃」

隨著香港人口老化及政府推行社區照顧政策,令 社會對獨居長者的健康狀況及家居安全更為關注,本 會遂於九〇年開展一項名為「關懷獨居老人服務計 劃」,以回應社會的需要。

服務旨在為獨居或缺乏支援網絡的長者,提供社 交及心理支援。透過義工的定期探訪,與長者建立關 係,為他們提供情緒及心理支持,以減輕他們的孤獨 無助感。義工在探訪過程中,亦會為長者介紹區內的 社區資源,鼓勵長者多善用長者中心及其他支援服 務,以增強他們的社交網絡。

義工在探訪中,亦會特別關注長者的健康狀況,如察覺其有身體機能退化或其他疾病,便會轉介予本會護士義工跟進,讓有需要的長者能及早接受治療。在探訪過程中,義工亦會關心長者的心理及家居安全情況,並將有需要的長者轉介予本會社工及職業治療師作跟進。透過這些服務,便能儘早察覺長者潛在的問題及危機,並協助他們獲得適當的服務。

在義工方面,現時主要是透過香港理工大學護理學系及義務工作發展局招募,每年招募超過四十位義工,招募的情況十分理想。他們主要探訪由綜合家居照顧服務隊所轉介的長者,這些長者大多是體弱及缺

乏支援。為確保義工能有足夠技巧推行服務,在服務開展前,會安排義工參加一系列的訓練課程,本會亦會定期安排分享聚會,讓義工們分享探訪所遇到的困難及感受。社工亦會在整個探訪計劃中給予支援及意見,令義工們能順利推行服務。

在過去數年,每年的服務都加入新主題,令服務內容更豐富。在二零零八年,在訓練課程中,加入「正面思想」和「快樂元素」的概念,讓義工在探訪過程中,將這些正面的能量帶給長者。而在二零零九年的服務,則以「抗逆智慧」為主題,義工將長者在人生旅途上的抗逆故事撰寫下來,由本會輯印成書,分發予社區人士,以增強抗逆能力。而今年亦以「我有我堅強」為題,義工會從長者的人生故事中,收集長者的「勵志金句」,並製作成書簽,送予社區人士。

這服務已推行了超過十多年,期間共探訪了超 過伍百多位長者,並關注他們的身心需要。在服務 成效方面,從長者的檢討問卷中,平均有超過百份 之八十的長者認同義工探訪能減輕他們的孤獨感及 增加他們對社區資源的認識;在義工方面,更有 超過百份之九十的義工表示服務能增加他們對體 弱長者的日常生活及需要的認識,亦有超過百份 之八十的義工表示增強了與長者的溝通技巧。這 些數字反映出服務的價值及成效。

「關懷獨居老人服務計劃」的活動成效是正 面而肯定的,本會會持續發展此服務,並按需要 加入新的原素,期望把服務做得更好,令更多長 者受惠。

With the rapid growth in elderly population in Hong Kong as well as the Government policy of 'Care in the Community', there is increasing concern over the health and home safety of those elderly who are living alone. To address this issue, the Care for the Elderly Living Alone Service was launched since 1990.

The service aims to provide social and psychological support for the living alone elderly as well as those with weak social network. Through regular visits, volunteers can provide emotional and psychological support to the elderly so as to reduce their sense of loneliness and alienation. Volunteers also introduce appropriate community resources to the elderly and encourage them to utilize these resources so as to widen their social support network.

Besides, volunteers also attend to the elders' health conditions and home safety. They will report any specific observations, such as symptoms of depression, home safety problems and deterioration of the elders' physical conditions. Follow-up actions are taken immediately to ensure the elderly can continue living in the community safely and independently. For those elderly who require medical advice, referrals are made for our nurse volunteers to conduct follow up home visits to provide consultation and advice on medication. Referrals to our occupational therapist for assessment and advice on home adaptation or modification are also made to ensure the

elderly live in a safe environment. Social worker also provides follow-up for elderly with symptoms of depression and family problems.

Volunteer recruitment is made through the School of Nursing of the Hong Kong Polytechnic University and Agency for Volunteer Service. The result is encouraging and over forty volunteers are recruited annually. The elderly being visited are referred by Integrated Home Care Service Teams and are largely physically weak, home bounded and with little social support. To prepare volunteers for service, a series of training are organized.

Regular sharing meetings are held so as to provide opportunities for sharing. Continual advice and support are also rendered to enable them to carry out the services smoothly.

During the past years, special themes were incorporated in the visits to enrich the service content. In 2008, the volunteers were trained to instill the concept of 'positive psychology' to the elders during the visits. In 2009, a booklet on the collective wisdom of the elderly when facing adversities in their lives was compiled and published. The booklets were disseminated to the public to promote the message of positive thinking. This year's theme is to collect the wisdom of the elderly when facing life crisis.

Since the commencement of operation of the service, over 600 elderly were visited by our volunteers. The overall response was very encouraging. Over 90% of the volunteers expressed that the service could enhance their understanding of the needs of the frail elderly and over 80% expressed that the visits could enhance their communication skills with the elderly. At the same time, over 80% of the elders being visited expressed that the visits could reduce their loneliness and alienation and enrich their knowledge on community resources.

These responses have demonstrated the effectiveness of the service. Our Association will continue to upgrade the service quality through injection of new elements to ensure the elders can benefit from the service.
